

Document Automation Pilot Review

Tech Innovation themed executive memo

Executive Summary

- The document automation pilot reduced turnaround time from five days to two days while increasing throughput.
- Template standardization lowered formatting rework from 14 items to 4, and reviewer satisfaction improved from 3.4 to 4.5.
- Continue the pilot for one more quarter, add a reviewer checklist, and publish a shared theme package.

Pilot Metrics

- Turnaround time: baseline 5 days, pilot 2 days, change -3.0 (-60%).
- Formatting rework: baseline 14 items, pilot 4 items, change -10.0 (-71%).
- Reviewer satisfaction: baseline 3.4 score, pilot 4.5 score, change +1.1 (+32%).
- Documents processed: baseline 18 documents, pilot 42 documents, change +24.0 (+133%).

Main Points

- The pilot compressed document turnaround from five days to two days.
- Reviewers observed fewer formatting issues after template standardization.
- The required executive memo, PDF export, and five-slide summary deck are aligned to a shared theme.
- Risks remain around inconsistent source data quality and unclear ownership of final review.

Recommended Next Steps

- Extend the pilot for one quarter with a defined success scorecard.
- Create a reviewer checklist covering source data completeness, formatting, and final approval ownership.
- Publish and govern a shared Tech Innovation theme package for memo, PDF, and deck outputs.
